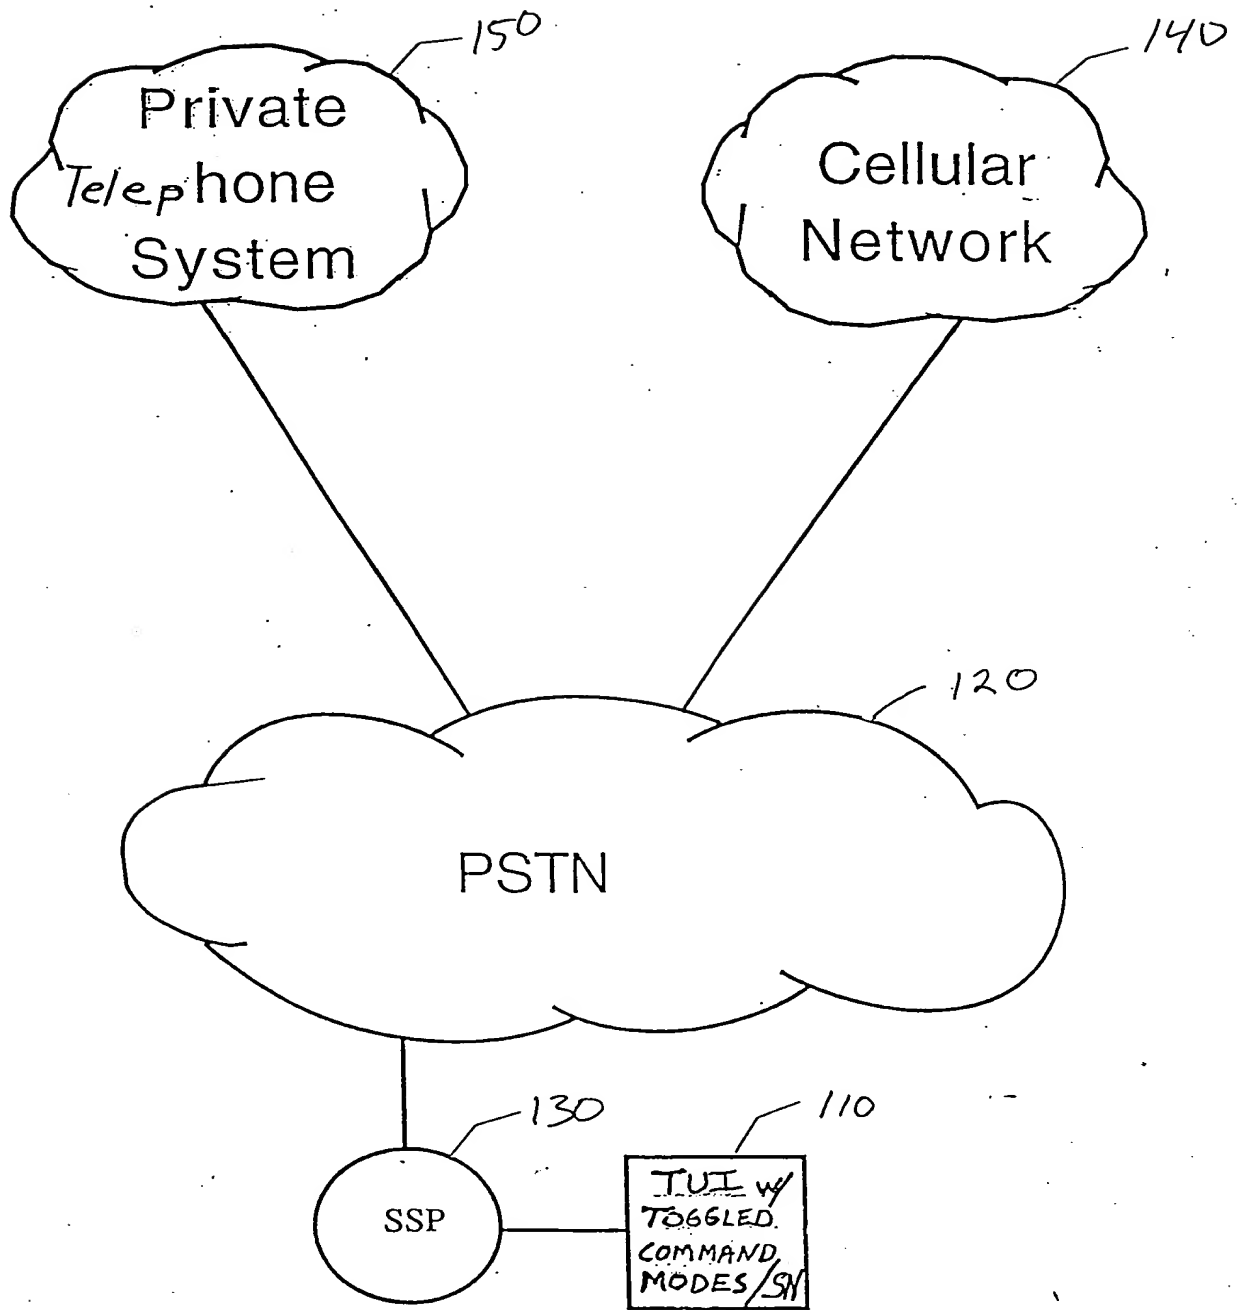

Fig. 1

The diagram illustrates a computer system (200) connected to a Public Switched Telephone Network (PSTN) (120). The computer system (200) consists of a central processing unit (200, PROCESSING UNIT) which includes a display device (220) and a memory storage device (210). It is also connected to an input device (230) and an interface device (240). The interface device (240) is connected to the PSTN (120) via a communication line (250). Additionally, the interface device (240) is connected to terminating equipment (260) via a line (270).
